

# CURRICULUM FAIR 2012

What  **classes** best fit in your plan to success?

Parents and students are invited to visit with counselors, teachers and administrators at any District 150 High School to learn about the options each student has when registering for classes for the 2012-2013 school year. At each school's curriculum fair, parents and students can ask questions that will help students be challenged in their course-work, yet also follow a course plan that will help them be most successful in high school and after graduation. Discover the course offerings at each school, ask about the level of rigor and look in to the pre-requisites that are required for courses. Be prepared and informed for high school registration in February!
